

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Canceled).

Claim 2 (Currently amended): A display control apparatus for image forming apparatus comprising:  
~~that features:~~

    a first operation panel with which operators can select multiple functions of an image forming apparatus ~~that has aforementioned multiple functions;~~

    a second operation panel that is configured so that it can be loaded and unloaded freely to/from the  ~~aforementioned~~ image forming apparatus and with which operators can select the  ~~aforementioned~~ multiple functions;

    a detection means to detect whether the second operation panel is loaded or not when the  ~~aforementioned~~ image forming apparatus is turned on; and

    a controlling means that controls the  ~~display of~~ items so that predefined display items are displayed on the  ~~aforementioned~~ first operation panel when the  ~~aforementioned~~ detection means determines that the  ~~aforementioned~~ second operation panel is not loaded, and

~~adds adding~~ to the predefined display items; at least a mode button that can switch the  display of items on the second operation panel  ~~is displayed~~ when the  ~~aforementioned~~ detection means determines that the  ~~aforementioned~~ second operation panel is loaded.

Claim 3 (Currently amended): A method of providing user interface displays in an image forming apparatus, the image forming apparatus having a first, standard display device and a second, optional display device, the method comprising:

testing if the second, optional display device is available;

if the second, optional display device is available, then providing a first standard user interface to the first display device and an operation guidance interface to the second display device;

if the second, optional display is not available, then providing a second standard interface to the first display device;

wherein the first standard interface includes an option for the user to select a different interface and the second standard interface lacks an option for the user to select a different interface.

Claim 4 (Currently amended): The method of providing user interface displays in an image forming apparatus of claim 3, wherein if a user selects the option for the different interface, then providing the different interface to the first display device and the second display device,

Claim 5 (Original): The method of providing user interface displays in an image forming apparatus of claim 4, wherein the different interface comprises an advanced interface.

Claim 6 (Original): The method of providing user interface displays in an image forming apparatus of claim 5, wherein the advanced interface includes an option for the user to select a custom interface.

Claim 7 (Original): The method of providing user interface displays in an image forming apparatus of claim 6 further comprising, if the user selects the option for the custom interface, then providing the custom interface to the first display device and the second display device.

Claim 8 (Original): The method of providing user interface displays in an image forming apparatus of claim 3, wherein the first standard interface and the second standard interface are substantially identical except for the option for the user to select a different interface.

Claims 9-30 (canceled).

Claim 31 (New): The display control apparatus for image forming apparatus of claim 2, wherein the controlling means further controls the display of items so that if a user selects the option for the different interface, then the different interface is provided to the first display device and the second display device.

Claim 32 (New): The display control apparatus for image forming apparatus of claim 31, wherein the different interface comprises an advanced interface.

Claim 33 (New): The display control apparatus for image forming apparatus of claim 32, wherein the advanced interface includes an option for the user to select a custom interface.

Claim 34 (New): The display control apparatus for image forming apparatus of claim 33 wherein the controlling means further controls the display of items so that if the user selects the option for the custom interface, then the custom interface is provided to the first display device and the second display device.

Appl. No. 10/624,045

Amendment. Dated 6/12/2007

Response of Office Action Dated 04/04/2007

Claim 35 (New): The display control apparatus for image forming apparatus of claim 2, wherein the first standard interface and the second standard interface are substantially identical except for the option for the user to select a different interface.
